SUMMARY

Bachelor of Science in Computer Science. Tuwaiq Academy cybersecurity bootcamp graduate in defensive security. Previously held roles in data center operations at Abaja Contracting and vulnerability scanning at Delta Line.

CORE TECHNICAL SKILLS

Security operations

- Blue team concepts, hardening, least privilege, backups
- ELK Stack and Splunk for log search, dashboards, and monitoring
- Linux and Windows servers, Nginx, general server administration

Testing and assessment

- Vulnerability scanning and manual checks, including Nmap
- Penetration testing practice in labs and on real applications
- Common issues framed with OWASP-style awareness

Applications and identity

- Web and API security. sessions, JWT, NextAuth.js where relevant
- Mobile security basics on Android and iOS from a review perspective
- OAuth2, SSO, and role-based access control

Engineering and research

- Python, Bash, SQL, Git workflows, CI/CD pipelines, Docker basics
- Reverse engineering, CVE research and proof of concepts, TryHackMe and CSRF labs

EXPERIENCE

Cybersecurity Bootcamp Trainee - Tuwaiq Academy (Feb 2026 - Aug 2026)

Blue team training and OSDA, defensive security. incident response, adversary simulation. <https://q5.qa/tuwaiq.pdf>

Computer Science Specialist - Abaja Contracting (Tamheer, Jul 2025 - Jan 2026)

Data center operations on Ubuntu and Nginx, server management, backups, and operational security. <https://q5.qa/Abaja.pdf>

Cybersecurity Trainee - Delta Line (Sep 2025)

Vulnerability scanning on systems and reporting findings. <https://q5.qa/delta.pdf>

PROJECTS

DFIR Log Analysis Challenge

A 25-question DFIR lab analyzing Windows security logs from Splunk, Elastic, or Event Viewer to trace the attacker through persistence and lateral movement.

Server Side Exploit - TryHackMe room

Chained web exploitation through shell access to privilege escalation.

Linux on Web

Isolated browser Linux for command-line and security tooling practice.

RealWorldv Event Generator

AI-powered security event generator that creates realistic attack scenarios as logs for ELK Stack, Splunk, and Windows Event Viewer for hands-on SOC practice.

All projects at <https://github.com/6lj> or <https://portfolio.q5.qa>

CSRF lab

Bank-style GET CSRF with malicious HTML payload practice.

Memory Editor "Hex-X" (closed source)

Android reverse engineering on APK and runtime memory.

Memory allocate script (Lua)

Low-level Android memory allocation for tamper and debug scenarios.

Captive portal Android Hotspot

Captive portal for Android Hotspot, supports Android, iOS, macOS, Windows.

WebDroid - N7

Android 7.1 system built with pure web technologies.

EDUCATION

Master of Science in Cybersecurity

University of Bisha

August 2026 – Present

Bachelor of Science in Computer Science

Najran University

September 2020 – June 2025

CERTIFICATIONS

CySA+ (CompTIA Cybersecurity Analyst)

Validates cybersecurity analyst skills including threat detection, security monitoring, and incident response.

OSDA (SOC-200) (OffSec)

Strengthens defensive SOC skills for threat detection, log analysis, and incident response.

eJPT - Junior Penetration Tester (INE)

Validates practical penetration testing skills including network reconnaissance, exploitation, and post-exploitation.

PEN-100 (OffSec)

Provides practical penetration testing workflow from enumeration to vulnerability validation.

Hardware and Operating Systems (IBM)

Improves endpoint hardening with better OS internals understanding and secure configuration practice.

Certificate IDs, verification, and more certificates- <https://cert.q5.qa>

Foundations of Cybersecurity (Google)

Builds core SOC knowledge for threat identification, triage, and defensive response.

eWPT - Web Application Penetration Tester (INE)

Validates web application security assessment skills including SQL injection, XSS, and authentication bypass.

CompTIA Security+ (CompTIA)

Validates baseline cybersecurity skills for threat identification, risk management, and incident response.

DDoS Attacks and Defenses (University of Colorado)

Supports network defense planning against volumetric attacks and service availability disruption.

Data Analysis: Basic Probability and Statistics (Harvard University)

Strengthens threat-hunting and detection tuning through probabilistic analysis and metric accuracy.

ACHIEVEMENTS

CyberDefender: Global Rank 19 & Top 3 Local

HackerOne: 7.5 CVSS - Unauthenticated GraphQL

CVE-2025-3639: Liferay MFA Bypass
